

1 Configuration of Passing on Document Links

Usage

You use the "Pass document links on" function if document links pertaining to input batches are also to be transferred to the generated output batch when changing output batches.

General

Different initial scenarios have to be taken into account for passing on document links. There are the following options:

- Inheritance/transfer for simple batches
- Pass on simple batches/merged batches and their subordinate batches to merged batches and their subordinate batches when collecting serial numbers
- Pass on merged batches to merged batches when merging serial numbers

Basic configuration

Passing on of document links is based on document management, which has to be enabled accordingly.

System configuration

The option of passing document links on is enabled for the [material type](#) of the input batch using this option:

- Input batch processing > pass document links on
