1 Overview Assignment of Secondary Resources

Purpose

This functions package allows the tools or resources used to be inspected in HYDRA shop floor scheduling.

You use this functions package if, in addition to the workplace-related capacity inspection, you also want to perform a resource-related capacity inspection during planning and these resources are to be managed in tool and resources management.

Features

- Capacity inspection of the tools and resources used in HYDRA shop floor scheduling
- Capacity inspection accounting for the resources that are configured for inspection in the list of production resources and tools.
- Display of a conflict list with multiple assignments.
- Display of the resource assignment in the form of a GANTT diagram.
- Graphic display of the required resources incl. staff and qualifications as capacity build-ups.

Requirement: Tool and resources management must be licensed and installed.
