1 Security Control Center - Overview

Purpose

This function package offers the possibility to present graphically the accesses and access groups and to display the alerts that might exist. Floor plans of buildings can be integrated as background image. You can show the location of the accesses and access groups on these plans.

Implementation notes

You use the function package if:

- you use HYDRA access control system (ZKS) and want to have a graphic overview of the status of your accesses and access groups.

Integration

This function package can only be used if the HYDRA access control product group is in use (function package *access control management functions*).

Features

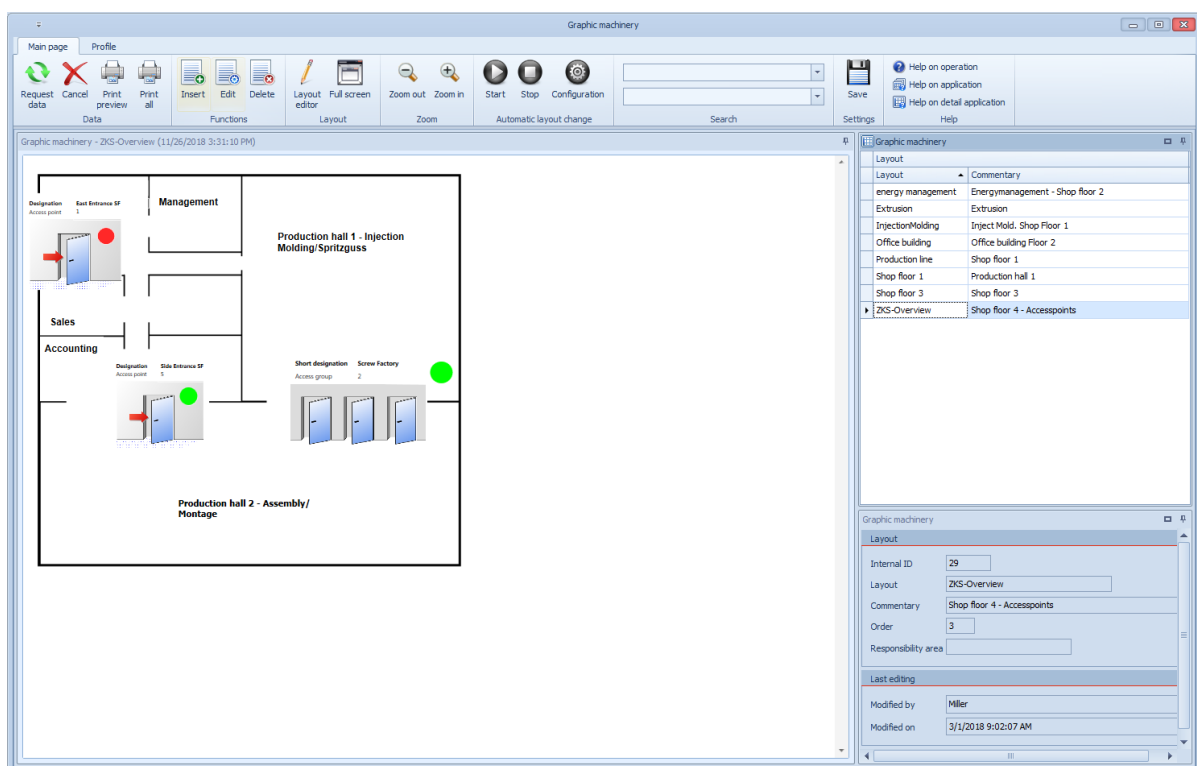

- Security control center
 - Graphic presentation of accesses and access groups
 - Display of the status of accesses and of alerts that might exist (if you use the alarm system)
 - Integration of floor plans of buildings as background image
 - Graphic tools to develop individual layouts

2 Security Control Center

Overview

Menu	Human resources management → Access control → Security control center Information management → Access control → Security control center
Transaction code	mpark
Function authorization	mpark

The security control center provides an overview of the entrances/accesses and their statuses:

The functions of the security control center are integrated in the [Graphic machinery](#).
