

Archiving Personnel Scheduling

Overview

There is no archiving of data in the PEP (Personnel Scheduling) in the long-term. The reason for it is that default daily data is archived generally for 100 days, which is normally sufficient.

Configuration

You can setup data retention in the database using [Data management](#). The request to delete data is run from a central archiving script hyarc.scr. This program is planned to run on a daily basis within the [Scheduler](#) by default.

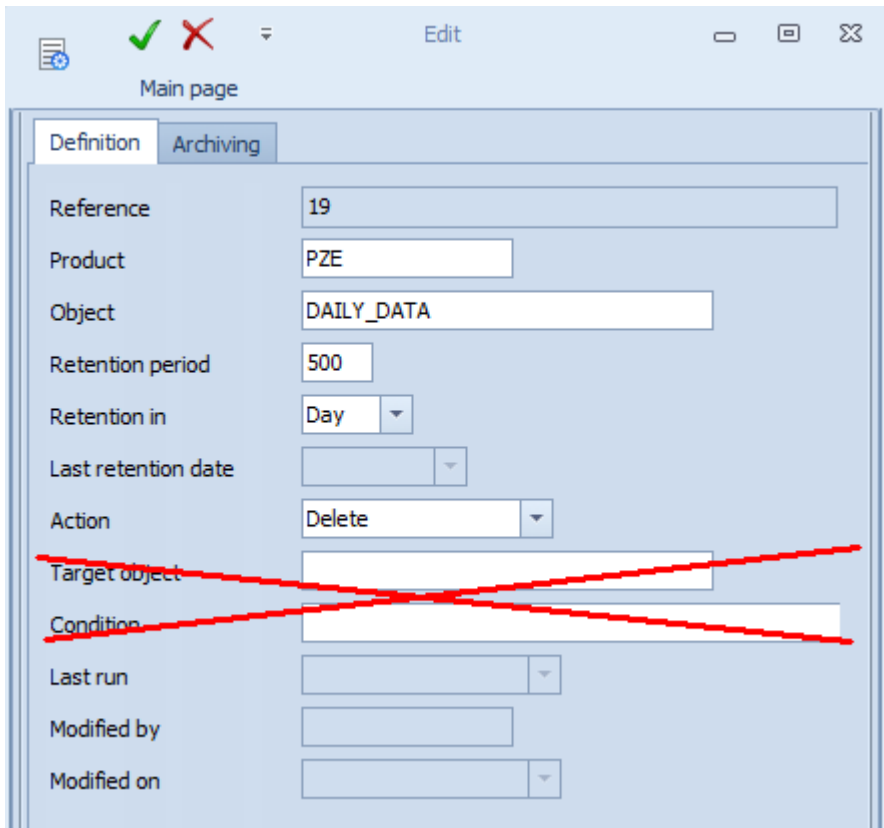

Product	Object	Object name	Perform	Default interval
PEP	DAILY_DATA	Workplace assignment	Data is deleted. Data is not transferred into archiving tables.	100 days

Restrictions

The data management for PEP is restricted in its functionality compared to other products groups, which have increased archiving functions:

- Default action is "**Delete**".
- The default action is "**Export**" introduced with Service Pack 7. Data is exported into text files into the HYDRA server. MPDV offers a special service where data is checked and if necessary retrieved. To retrieve exported data by the customer using the reload manager, for example, is not possible.
- The action "**Archiving**" is not permissible. ZKS do not offer archiving data in the long-term.
- Data retention can only be configured per product/object. Deviating settings for individual database tables are not available.

- Using field like "Target object" and "Condition" are not permitted.

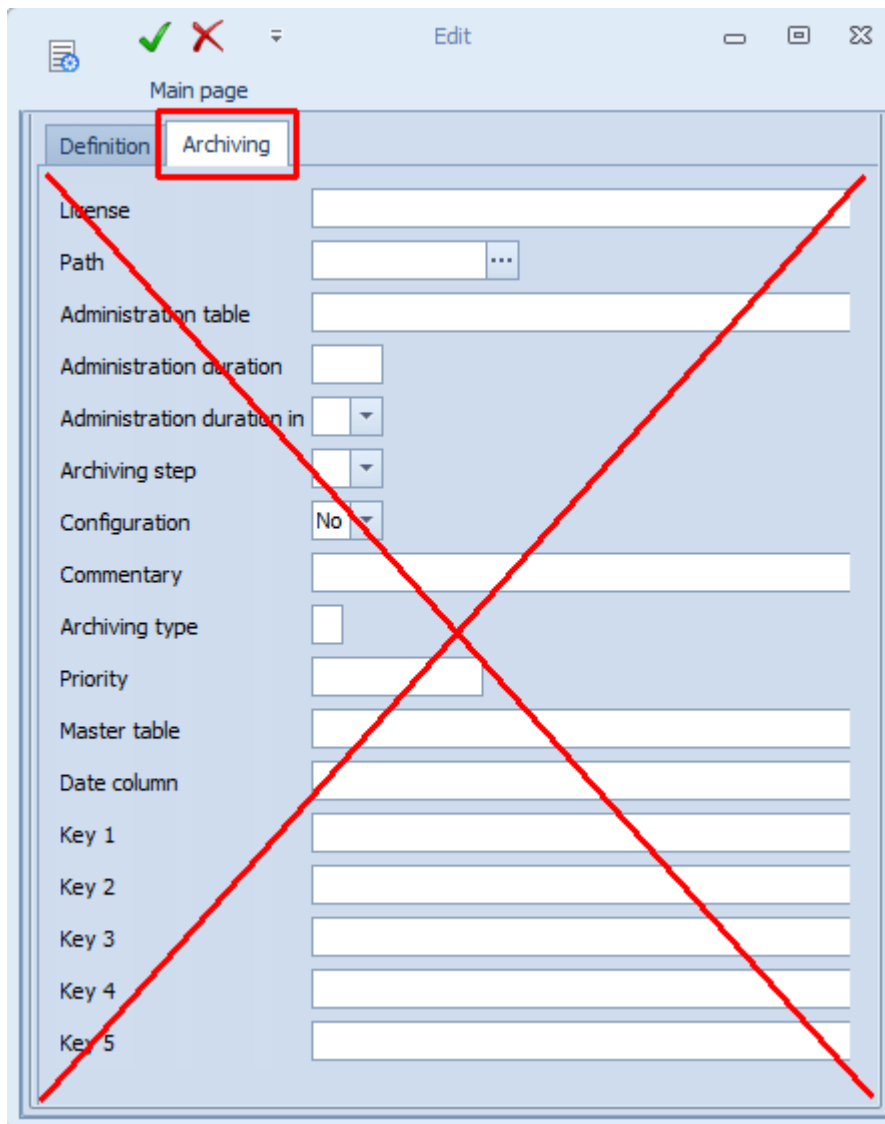

The screenshot shows a software window titled "Main page" with a tabbed interface. The "Archiving" tab is selected. The form contains the following fields and values:

Field	Value
Reference	19
Product	PZE
Object	DAILY_DATA
Retention period	500
Retention in	Day
Last retention date	
Action	Delete
Target object	
Condition	
Last run	
Modified by	
Modified on	

The "Target object" and "Condition" fields are crossed out with a red X, indicating they are not permitted.

- Configuration options in the tab „**Archiving**“ are not supported. The field may not be filed.

The screenshot shows a software window titled 'Main page' with a toolbar at the top containing a settings icon, a green checkmark, a red X, and an 'Edit' button. Below the toolbar, there are two tabs: 'Definition' and 'Archiving'. The 'Archiving' tab is selected and highlighted with a red rectangular box. The form area below the tabs contains various configuration fields, all of which are crossed out with a large red 'X' that spans the entire width and height of the form area. The fields include:

- License
- Path
- Administration table
- Administration duration
- Administration duration in
- Archiving step
- Configuration (set to 'No')
- Commentary
- Archiving type
- Priority
- Master table
- Date column
- Key 1
- Key 2
- Key 3
- Key 4
- Key 5
