

1 Workforce Requirements - Operations

Summary

The workforce requirements are defined depending on the scheduled operations. The requirement is specified either with the production resources and tools or the machine/ operator relation. As an alternative, the [workforce requirements can also be stored at the workplace](#).

Definition of the workforce requirements in the production resources and tools

Menu	Order management → Order management → Prod. resources + tools
Transaction code	edres
Function authorization	edopres

The workforce requirements for each operation can be stored in the production resources and tools.

The screenshot displays the SAP 'Prod. resources + tools' application. The main window is titled 'Prod. resources + tools'. It features a top toolbar with icons for 'Request data', 'Cancel', 'Print preview', 'Print all', 'Insert', 'Edit', 'Delete', 'Edit operations', 'Edit orders', 'Order information', 'Save', 'Settings', and 'Help'. Below the toolbar, there is a 'Selection' section with a search bar for 'MES order number' containing 'S30002000'. The main area is divided into two panes. The left pane shows a table of production resources and tools, with columns for 'Order', 'Prod. resources + tools', and 'Quantities'. The right pane shows a detailed view of a specific resource, including fields for 'MES order number', 'Resource type', 'Resource', 'Designation', 'Comment 1', 'Comment 2', 'Quantity', 'File', 'Path', 'File name', 'Last change', 'Modified by', and 'Modified on'.

Order	Prod. resources + tools	Quantities
MES order number	Resource type	Required quantity
S30002000100	DOC	SW-1290-12
S30002000100	WNR	STZ-L-FKA011
S30002000200	DOC	DOC-EL1200GT
S30002000200	WNR	EL1200GT
S30002000300	DOC	DOC-L-FKA021
S30002000300	DOC	FP-HTE
S30002000300	WNR	DUE-SALF
S30002000400	DOC	SW-1290-12

Prod. resources + tools

MES order number: S30002000100

Resource type: DOC

Resource: SW-1290-12

Designation: Bill of material overview

Comment 1: Picture with foto "Mirror"

Comment 2:

Quantity: Required quantity 1

Field descriptions

MES order number

Operation number to which the production resources and tools are assigned.

Resource type

Type of the resources and tools, an operation shall be assigned to. For personnel scheduling, resource types PER (production) and PRU (set up) are relevant.

Resource

Unique number of the qualification from the [qualifications](#) of the personnel scheduling.

Designation

Here you can indicate a designation of the production resources and tools.

Remark 1/ Remark 2

These fields are comment fields.

Required quantity/ unit

Number of employees with the corresponding qualification required for processing the operation. The workforce requirements can be entered with up to two decimal places. The quantity unit has the character of a comment.

Path

Relevant for production resources and tools DOC. This field must be left blank for all other production resources and tools.

File

Relevant for production resources and tools DOC. This field must be left blank for all other production resources and tools.

Multiple workforce requirements with various qualification can be defined for one operation in production resources and tools.

Definition of the requirement in the machine/ operator relation

Menu	Order management → Order management → Edit operations
Transaction code	edop
Function authorization	edop

As an alternative to defining the workforce requirements using production resources and tools, it can also be stored in the machine/operator relation of the operation. Contrary to the production resources and tools for setup and production the personnel requirements can only be defined for one qualification.

When editing operations, the fields M/O relation setup and M/O relation production are found in the Processing tab.

Field descriptions

M/O relation setup

Workforce requirements for set up.

Qualification (Setup)

Unique number of the qualification from the [qualifications](#) of the personnel scheduling.

M/O relation production

Workforce requirements for production.

Qualification (production)

Unique number of the qualification from the [qualifications](#) of the personnel scheduling.

The machine/ operator relation is only relevant for personnel scheduling if a qualification is entered into the underlying field.
