

Resource attributes

5.1 Summary

HYDRA menu	Master data → Resources → Resource attributes
FEDRA menu	Detailed Scheduling → Master data → Resource attributes
Transaction code	resattr
Function authorization	mdresatt

This document describes the application "Resource attributes" on the client.

Purpose

This application allows for the maintenance of values for resource attributes.

Please note:

Resource attributes (indirect users fields) are available for the object resources (HYDRA WRM/ DNC), the CAQ inspection plans (CPPL) and CAQ inspection requirements (CPAN).

Opens the dialog for editing a comment.

Selection criteria

The application provides the following selection criteria:

Resource type

Type of resource.

Workplaces and machines always have the resource type MNR, whereas for customizing other resources can be given individual resource types. Predefined resource types include:

DNC	NC-/ DNC program
DOC	Document
ENE	Energy meter
ENT	Extraction device
ENT	Extraction device

MNR	Workplace/ Machine
PAC	Packaging, transportation container
PRM	Test and measuring equipment
PER	Production staff / general
PRU	Set up staff
TEM	Tempering equipment
VOR	Device
WNR	Tool

We recommend using predefined resource types.
