

1 Work Plan - Edit Operation Long Texts

1.1 Overview

HYDRA menu	Order management → Routing management → Work plan - Edit long texts of OP
FEDRA menu	Detailed Scheduling → Order management → Work plan - Edit long texts of OP
Transaction code	edwoptx
Function authorization	edwoptx

You can use the application Work plan - edit long texts of operation to collect additional texts for the operation. You can record only one long text per operation.

Please note

- Long texts can also be transferred using the system's info interface (record type "AI"). For further information on the interface, please refer to the corresponding interface documentation.
- The terminal shows the long texts relating to operations.

Selection criteria

The application provides the following selection criteria:

MES work plan number

Enter the MES work plan number to select the long text of a specific operation of the work plan. The MES work plan number is the combined work plan/operation number.

Field Descriptions

The fields of a long text pertaining to orders are described [here](#).

Editing functions

Please use the available buttons to create or edit operation long texts of the work plan. A copy function for operation long texts is not planned.

Toolbar

Edit operations

Function authorization: edwop

Opens the application [Work plan - edit operations](#) for the currently selected data record.
