1 Overview Assignment of Secondary Resources

Purpose

This function package allows for the tools or resources used to be checked in HYDRA Shop Floor Scheduling.

You use this function package if, in addition to the workplace-related capacity check, you also want to perform a resource-related capacity check during planning and these resources are managed in the Tool and Resources Management module.

Features

- Capacity check of the tools and resources used in HYDRA Shop Floor Scheduling.
- Capacity check accounting for the resources that are configured for checking in the list of production resources and tools.
- Display of a conflict list showing multiple assignments.
- Display of the resource assignment in the form of a GANTT diagram.
- Graphic display of the required resources including staff and qualifications as capacity build-ups.

Requirements: The Tool and Resource Management module must be licensed and installed.
