

MDP Training Workshop: Part 4: Company Car Management Example

Stephen Griffith, mesonic International

June 2020

Company Car Manager

- ✓ Example 1.1 – Company Car Manager Window
 - ✓ Information is stored in a user-defined database table on company cars used by individual employees.
 - ✓ Information is managed in a new WinLine window that is called up with a separate menu item.
 - ✓ The car make, car licenes plate, and acquisition date is stored for each existing company employee and displayed in a grid control in the new window
 - ✓ A report for the entered data can be printed to the screen or the printer.

Thank you for your participation!
See you at the next seminar!
