

1 Enter Goods Receipt Batch

Summary

A new goods receipt batch may be created in the system via the "enter GR batch" button.

Configuration

Further system configurations are not required to enter goods receipt batches.

Having clicked the "OK" button, the batch is created and the dialog remains open for further entries.

Batch numbers may be generated automatically or manually depending on the configuration. Moreover, the following data is saved at the batch.

Workplace

Machine where the batch was recorded

Operation

Order where the batch was recorded

Material

Material number of the batch

Quantity and unit

The batch is created with the quantity and unit entered here. A goods receipt is posted with the quantity.

Quality

A batch may be classified as yield or scrap quantity, rework or open quantity. The system creates yield batches with the "free" status. Scrap batches automatically get the "blocked" status and the batch class "scrap". When scrap is selected, a valid scrap reason has to be assigned additionally with respect to the corresponding workplace.

Target buffer

Material buffer for which the current batch is to be produced. The output material buffer of the machine is pre-assigned as default value.

Transport unit

A transport unit defined within the system may be assigned here.

Comment on batch

In this field a comment may be saved for the goods receipt batch.
