

1 Reserve Transport Order

Overview

License	MPL-TRA
---------	---------

Usage

The functionality described below enables a logical reservation to be made for the operation of a transport order.

Prerequisite

The database patch ***dbp_mpl_transportation.hsc*** must have been run.

The Initial status I and Prepared status (V) must be configured in the status assignment for the order type. It must be possible to change the status I manually.

Features

The BAPI call TRANR.RESERVE performs the following checks

- The transport order operation must exist and be in the Initial (I) status.
- As an option, the staff badge number is checked if it is transmitted (KNR)

Result of BAPI call TRANR.RESERVE:

- The transport operation is planned on the currently selected machine.
- The OP status of the transport order changes from Initial (I) to Prepared (V).
