

1 Access Profiles

Summary

Menu	Master Data → Access Control → Access Profiles
Transaction code	acpr
Function authorization	acpr

[Access authorizations](#) are defined by way of access profiles. When access profiles are created, they may be distinguished either by the location (e.g. administration, hall 1, warehouse, etc.) or by different activities (e.g. employees working in production, janitor, system administrator, etc.). Several access profiles may be assigned to a badge.

The screenshot shows the 'Access profiles' application window. The window has a menu bar with 'Main page' and 'Profile'. Below it is a toolbar with icons for 'Request data', 'Cancel', 'Print preview', 'Print all', 'Insert', 'Copy', 'Edit', 'Delete', 'Access authorizations', 'Access profile assignments', 'Save', and 'Help'. The main area is divided into two panes. The left pane shows a table of access profiles with columns 'Access profile', 'Designation', 'Responsibility area', and 'Last'. The right pane shows the details for a selected profile, including 'Access profile', 'Designation', 'Responsibility area', 'Last editing', 'Modified by', and 'Modified on'.

Access profile	Designation	Responsibility area	Last
1	Ward		Miller
2	Workers		Miller
3	Administration		Miller
4	Parttime Assistants		Miller
5	Boss		Miller
6	IT-Department		Miller
999	Basic Authorization		Miller

Access profile details:

- Access profile: 1
- Designation: Ward
- Responsibility area: [dropdown]
- Last editing:
 - Modified by: Miller
 - Modified on: 1/2/2000 2:10:10 PM

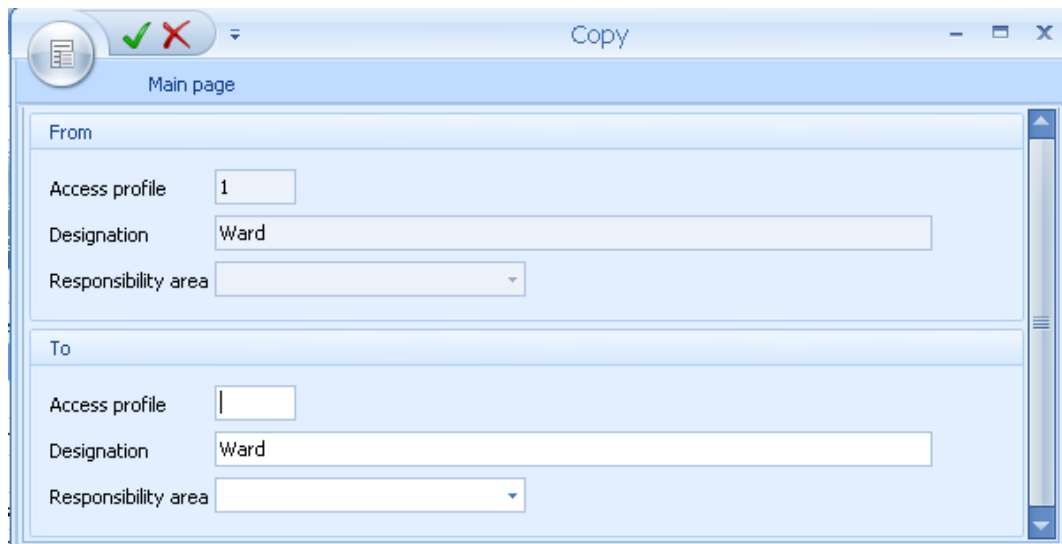

Access profiles provide the advantage that changes to the profile affect all badges that are assigned to it. Consequently, it is not required to revise each badge individually.

Toolbar

Copy

The following dialog opens to copy an access profile:

The image shows a 'Copy' dialog box with a title bar containing a document icon, a green checkmark, a red X, and a dropdown arrow. The main area is divided into two sections: 'From' and 'To'. Each section contains three fields: 'Access profile' (a text box with '1' in the 'From' section and an empty box in the 'To' section), 'Designation' (a text box with 'Ward' in both), and 'Responsibility area' (a dropdown menu in both). The dialog has a standard Windows-style border with minimize, maximize, and close buttons in the top right corner.

Along with the access profile, the [access authorizations](#) of the selected profile are copied as well.

Access authorizations

Displays and configures [access authorizations](#) for the selected access profile.

Access profile assignment

Opens [access profile assignments](#) for the selected access profile.
