

1 Dialog Error Log

Overview

HYDRA menu	System Administration → Monitoring → Dialog error log
FEDRA menu	System Administration → Monitoring → Dialog error log
Transaction code	dlgpro
Function authorization	dlgpro.*

Purpose

The application shows data resulting from the logging of returned dialog data strings. Data included in the “dialog error log” dialog complement the information determined within system logs.

Integration

The application is a central function used by many applications/functions.

If the escalation management module is in use the escalation `ERRPRO.ERROR_PROTOCOL_WRITTEN` is generated, which enables active notifications.
