Usage

This function shows stored simulations including their KPIs, which may be compared with each other. The KPIs for the simulations are provided in tabular form. For the presented simulation the best KPI value is highlighted in green and the worst KPI value is shown in red. The detailed screen on the right-hand side shows the KPIs of the currently selected planning.

The screenshot displays the 'Saved planning' SAP interface. The top bar includes navigation tabs for 'Main page' and 'Profile', along with icons for 'Request data', 'Cancel', 'Print preview', 'Print all', 'Delete', 'Save', and 'Help'. Below this is a 'Selection' section with date pickers for 'Plans created between' (2/25/2013 3:38:28 PM to 3/6/2013 3:38:28 PM) and a 'Planning run' field. The main area is divided into two panes. The left pane, titled 'Saved planning', shows a table of simulations with columns for 'Planning run', 'Commentary', 'Modified on', 'Evaluated ...', 'Utilization', and 'Lead time'. The right pane, titled 'Key figures', shows a detailed view of KPIs for the selected simulation, including 'Evaluated utilization', 'Utilization', 'Lead time', 'Evaluated idle times', 'Idle times', 'Wait times', 'Evaluated labor utilization', 'Labor utilization', 'Setup costs', 'Meeting deadlines', 'Delays', and 'Earliness'.

Selection criteria

The application provides the following selection criteria:

Plans created between

If these selection fields are filled out, only the simulations created within this selected period of time will be displayed.

Planning run

Using this selection field, simulations may be selected based on their memory ID ("planning run" field).

Comments

Using this selection field, simulations may be selected based on their comment.

Once a simulation has been selected, it is opened in the planning board.
