

1 Security Control Center

Overview

Menu	Human resources management → Access control → Security control center Information management → Access control → Security control center
Transaction code	mpark
Function authorization	mpark

The security control center provides an overview of the entrances/accesses and their statuses:

You have to enable the modification [GraphicMachinery2Search](#) in order to use the fields for searching for a specific access or access group in the *Search* section of the toolbar.

The functions of the security control center are integrated in the [Graphic machinery](#).
