

# 1 Configuration of Passing on Batch Attributes

## Usage

You use the "pass batch attributes on" function if attributes of input batches are to be transferred to the generated output batch when changing output batches.

## General

Different initial scenarios have to be taken into account for passing on batch attributes. There are the following options:

- Inheritance/transfer for simple batches
- Pass on simple batches/merged batches and their subordinate batches to merged batches and their subordinate batches when collecting serial numbers
- Pass on merged batches to merged batches when merging serial numbers

## System configuration

The option of passing batch attributes on is enabled for the [Material type](#) of the input batch.

In addition, a configuration is required in [advanced object configuration](#). This configuration defines in a "material to material" relationship which attributes are to be taken over by which inheritance rule.

| Object type | Object ID 1 | Object ID 2 | Object ID 3  | Object ID 4 | Parameter  | Parameter value | Active |
|-------------|-------------|-------------|--------------|-------------|------------|-----------------|--------|
| MPL         | LEVEL       | VON_ARTIKEL | NACH_ARTIKEL | ATTRIBUT    | INHERITATE | Y/N             | Y      |

## Advanced object configuration

If the advanced object configuration includes an inheritance rule for the material of the input batch:

- the inheritance rule BATCH\_TO\_BATCH transfers the value of the specified attribute from the input batch to the output batch.
- the inheritance rule CHILD\_BATCH\_TO\_CHILD\_BATCH transfers the value of the specified attribute from the subordinate batch of the input batch to the generated subordinate batch of the output batch.
- the inheritance rule BATCH\_TO\_CHILDBATCH transfers the value of the specified attribute from the registered batch, for merged batches from the superordinate batch level, to the subordinate batch of the generated output batch.

### Inheritance/transfer for "simple" batches

Example

| BATCH_ATTRIBUTE | LEVEL          | VON_ARTIKEL | NACH_ARTIKEL | ATTRIBUT   |
|-----------------|----------------|-------------|--------------|------------|
| Example slide 1 |                |             |              |            |
| BATCH_ATTRIBUTE | BATCH_TO_BATCH | 4712        | 4713         | ATTRIB_101 |
| BATCH_ATTRIBUTE | BATCH_TO_BATCH | 4712        | 4713         | ATTRIB_102 |
| BATCH_ATTRIBUTE | BATCH_TO_BATCH | 4712        | 4713         | ATTRIB_103 |
| BATCH_ATTRIBUTE | BATCH_TO_BATCH | 4711        | 4713         | ATTRIB_111 |
| BATCH_ATTRIBUTE | BATCH_TO_BATCH | 4711        | 4713         | ATTRIB_112 |
