1 Display Tooling Sheets

Purpose

DNC administration treats NC programs or setting data records as resources in the HYDRA system. In connection with the resources BOM function, documents can be linked with NC data records. These documents are then available to be displayed on the operator terminal.

You use the function package if:

- You would like to link NC programs in HYDRA with documents and display them on the client and the terminal.

Integration

The basic DNC administration function is needed.

Features

Displays additional information about NC programs at BDE/ DNC terminals and at PCs during work scheduling, in the foreman's office, etc.:

- Transfers the file-based additional information from the NC programming system if it offers a suitable interface.
- Visualizes the tooling sheets and similar documents that are assigned to the NC programs or the operations.
- Displays data using external programs such as MS Word, MS Excel or similar.
- Displays additional information from separate document administration in the HYDRA application Tools/ resources management and integrates it into the BOM function.
