1 Performance Analysis - General

1.1 General

It is the objective of the Performance Analysis to evaluate the data available from the connected systems. Subject to the evaluation's objective, the following dashboards may be chosen.

Please note: MES Cockpit uses a separate data basis including the functions integrated there.

2 Performance Analysis

2.1 Dashboard: Order Evaluation

Function authorization MC-OAnalysis

2.1.1.1 Order Overview Report

Tabular presentation of the order overview showing master data and the produced quantities including a yield rate for the single orders. The yield rate is displayed as a linear pointer.

2.1.1.2 Site Evaluation Report

Up to six selected KPIs of the selected orders are shown and grouped by the site (system).

2.1.1.3 Order Evaluation Report

Up to six selected KPIs of the selected orders are shown as bar chart. In addition, the mean value of the selected data is calculated and displayed.

2.1.1.4 RPA Analysis Report

The totals of individual RP accounts are presented for the selected orders in a pie chart.

Please note: If no values are available for individual RP accounts, they will neither be shown in the diagram nor the legend.

2.1.1.5 Production Overview Report

The production overview compares the entire yield and scrap quantities (primary quantity unit) of the selected orders.

2.1.1.6 Selections

The following selection options are provided in this dashboard:

- KPI
- Order numbers including site ID
- Header article (article/item of the order header)
- Customer number

2.2 Dashboard: Operation Evaluation

Function authorization MC-OPAnalysis

2.2.1.1 Operation Overview Report

Tabular presentation of the operation overview showing master data and the produced quantities including a yield rate for the single operations. The yield rate is displayed as a linear pointer.

The totals row shows the entire totals of yield and scrap quantities.

2.2.1.2 KPI Report

Up to three specified KPIs of the selected operations are shown over time. In addition, the arithmetic mean value of selected data and KPIs is calculated and displayed.

2.2.1.3 Article-Related Evaluation/Report

Up to three specified KPIs of the selected operations are shown over time grouped by the article number. In addition, the arithmetic mean value of selected data and KPIs is calculated and displayed.

2.2.1.4 Selections

The following selection options are provided in this dashboard:

- KPI
- Combined order and operation number including site ID
- Article
- Cost center

The following times/periods may be selected in this dashboard:

- Shift
- Day
- Month
- Quarter
- Year
- Calendar week
