1 SMA-ZIK Time Recording, Information, Corrections

Purpose

The function package **SMA-ZIK Time Recording, Information, Corrections** includes the following components:

- **Mobile time recording**
Mobile time recording allows clockings to be made via a mobile phone, tablet PC or the Internet. In addition, information on the current account balances can be displayed.
- **Personnel schedule**
This application shows the employee his/her personnel schedule for the next days. In addition to the planned shift and absence times, the workplace for which the employee is planned is displayed.
- **Time sheet**
This application can be used by the employee to obtain a display of his/her own time sheet and request the subsequent entry of forgotten clockings.

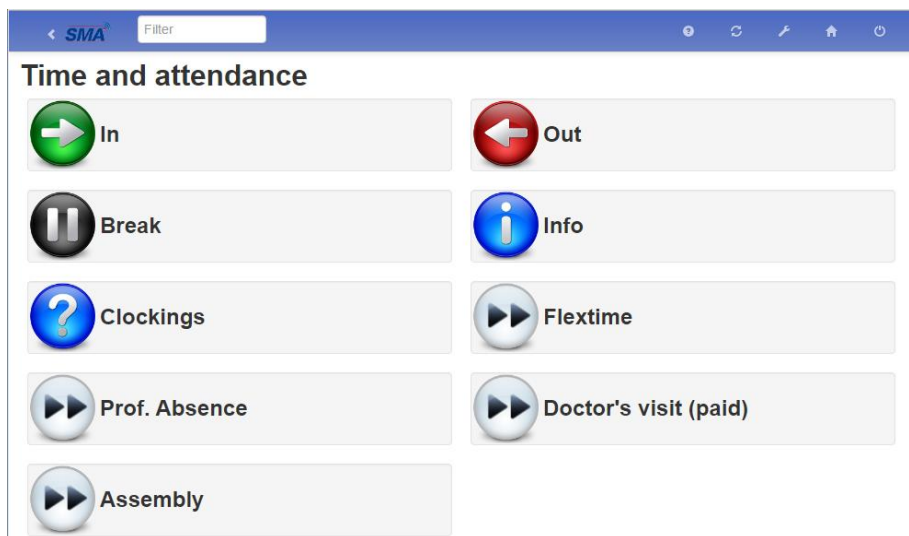

2 Mobile Time Recording

2.1 General

Employees can use the application *Time and attendance* to make clockings optionally at stationary PZE terminals or on a smartphone, tablet or the web.

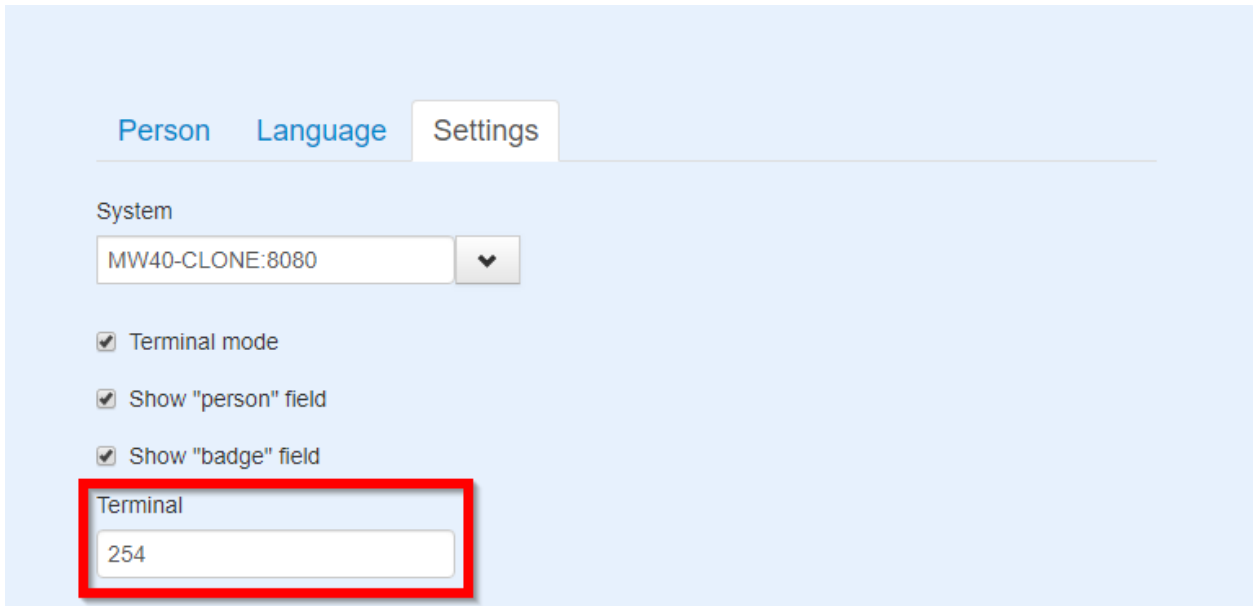

2.2 Overview

If you call the application, the following screen opens:

In the HYDRA standard, the terminal number 254 is stored in the SMA settings. This way, the SMA *Time and attendance* uses the selection of absence reasons and label texts for keys specified for terminal 254 in the terminal configuration (MOC). If you want to specify a different selection of absence reasons or different label texts on a specific PC used for SMA, then you must store an additional terminal configuration (MOC). Use terminal number 255, for example. For the PC in question, store the terminal number 255 in the SMA settings. The configuration of terminal 255 is then used for this PC.

If you change SMA settings, this change is stored for each Windows user separately. If you change the terminal configuration (MOC), these changes are applied when a person logs in the next time.

Person Language Settings

System

MW40-CLONE:8080

☒ Terminal mode

☒ Show "person" field

☒ Show "badge" field

Terminal

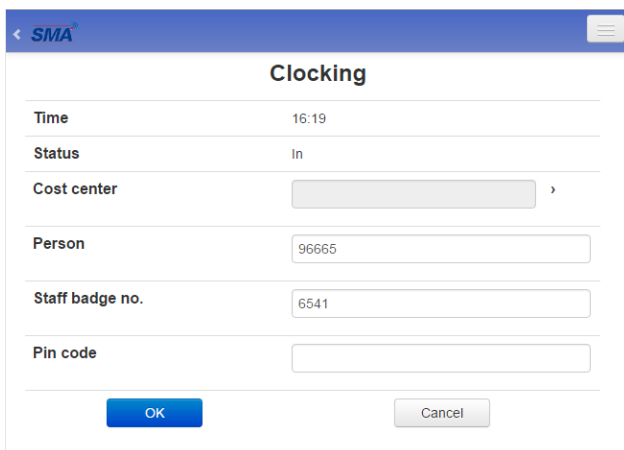

254

Note: For information on the terminal configuration on the MOC, refer to the documentation of the SMA implementation.

When you configure the terminal on the MOC, you must be careful to use **terminal type 254 (not terminal number !)**. This terminal type specifies the terminal as SMA terminal. This terminal type is not used when the licenses (e.g. AIP-HRF) are calculated and when system parameters for terminals are identified. This specification ensures that the number of required licenses is correctly calculated.

Making a clocking

To make a clocking, the following dialog opens:

< SMA

Clocking

Time 16:19

Status In

Cost center

Person 96665

Staff badge no. 6541

Pin code

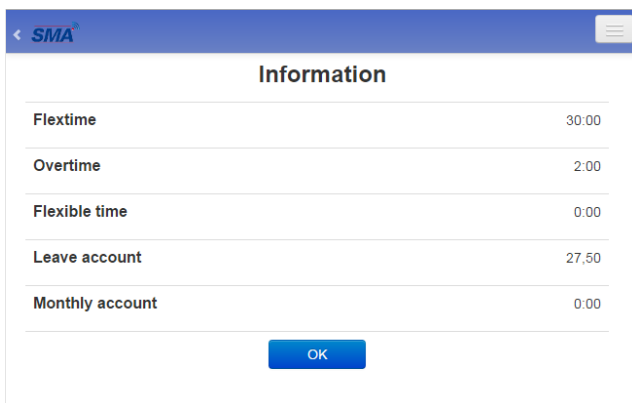

OK Cancel

If you click the field *Cost center*, a selection list opens. The time is then posted for the selected cost center. This field is only available if the option *Cost center posting* is activated in the settings.

Use the personnel number or the staff badge number and the pin code to identify the employee. The fields *Show "person" field* and *Show "badge" field* in the settings specify which of the two fields is available. If all three fields are not visible, the values stored in the settings are processed.

Info

Use the button with the symbol  to show the current account balances:

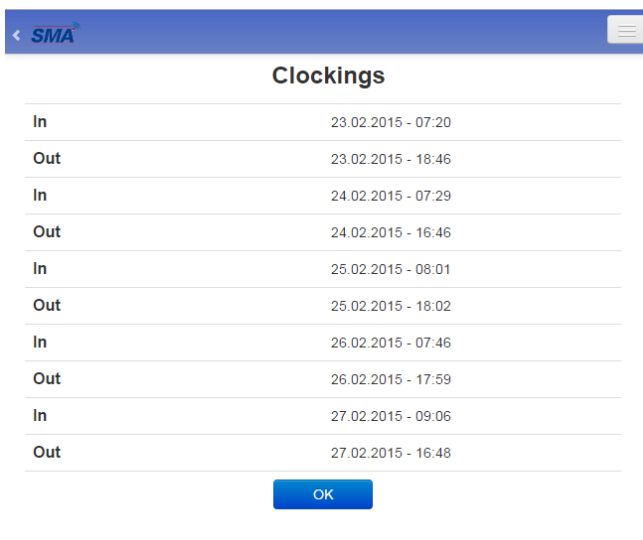

Information	
Flextime	30:00
Overtime	2:00
Flexible time	0:00
Leave account	27,50
Monthly account	0:00

OK

Displaying clockings

Use the button with the symbol  to show the clockings of the current day and of the last 7 days.

Clockings	
In	23.02.2015 - 07:20
Out	23.02.2015 - 18:46
In	24.02.2015 - 07:29
Out	24.02.2015 - 16:46
In	25.02.2015 - 08:01
Out	25.02.2015 - 18:02
In	26.02.2015 - 07:46
Out	26.02.2015 - 17:59
In	27.02.2015 - 09:06
Out	27.02.2015 - 16:48

OK

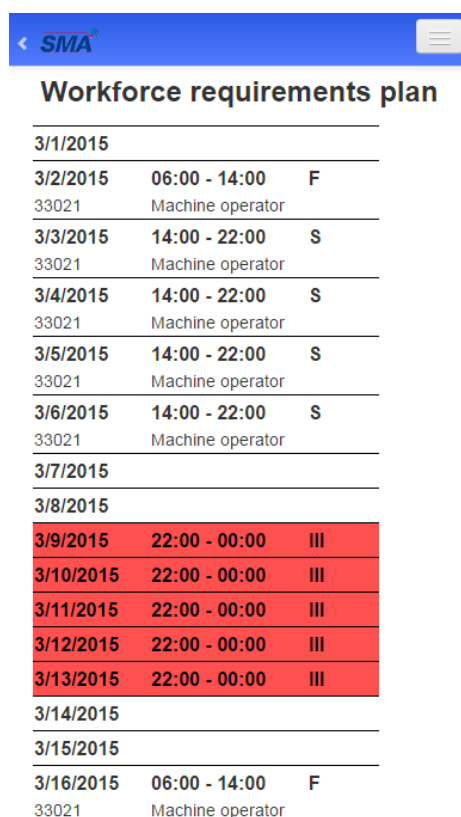

3 Workforce requirements plan

3.1 General

In the application *Workforce requirements plan*, the employee can view their planned absences and the work schedule for the days to follow. In addition, the workplace and the activity planned for the employee are shown if they have been assigned.

3.2 Overview

If you call the application, the following screen opens:

Workforce requirements plan		
3/1/2015		
3/2/2015	06:00 - 14:00	F
33021	Machine operator	
3/3/2015	14:00 - 22:00	S
33021	Machine operator	
3/4/2015	14:00 - 22:00	S
33021	Machine operator	
3/5/2015	14:00 - 22:00	S
33021	Machine operator

3/15/2015		
3/16/2015	06:00 - 14:00	F
33021	Machine operator	

4 Time Sheet

4.1 General

The employees can use this application to display their own time sheets for the current and for past settlement periods.

If clockings are missing, you can also make subsequent clockings and forward them to the supervisor for approval.

4.2 Overview

If you call the application, the following screen opens:

Time sheet

Settlement period: 2/2016 >

Person 5000
Name Berres, Bernd

Month 2 / 2016
Date 03.02.2016

Account balances at begin. of month
Flex Time 30:00
Vacation Account 35,5

Date	Beginning	End	Break	Type	Payment	Target time	Actual time	+/-	Flexible time	Overtime
01.02. Mo	7:29 AM	4:44 PM	12:30 AM	Present	10	8:00	8:45	0:45	0:00	0:45
02.02. Di	7:26 AM	5:07 PM	12:30 AM	Present	10	8:00	9:11	1:11	0:00	1:11
03.02. Mi	7:25 AM			IN only						
04.02. Do										
05.02. Fr										
06.02. Sa										
07.02. So										

You can specify the time sheet layout for each employee in the HR master data. If no time sheet is entered here, the time sheet number 10 is processed.

The time sheets are displayed as PDF. The browser must natively support the display (example: Chrome) or you must install a plug-in in the browser (example: Adobe Reader plug-in). It therefore depends on the browser and viewer/plug-in how you can control the display. If configured accordingly, it is possible that the PDF is not displayed, but the document is downloaded.

Function keys

Previous month

Displays the time sheet of the previous settlement period.

Subsequent entry of clocking

This button opens the dialog to record a subsequent clocking:

Subsequent entry of clocking	
Person	5000
Name	Berres, Bernd
Date	04.02.2016
In	07:45
Out	16:25
Commentary	Home work
OK Cancel	

When you have filled the field and confirmed the dialog by clicking **OK**, the clocking is forwarded to the supervisor for approval.

The button *Subsequent entry of clocking* is only available with HYDRA 8. To activate this button, set the entry "PersonEditClockings" to "true" in the file Web.config of the SMA installation (default storage location: "C:\inetpub\wwwroot\SMA\Web.config"):

```
<!-- Person edit clockings -->  
<add key="PersonEditClockings" value="true"/>
```

Next month

Displays the time sheet of the next settlement period.

By default, the settlement periods of the current year and of the last two years are available. If no data or no more data is available for a specific month because of data storage, an empty time sheet is issued.

5 Escalation for a Subsequent Clocking Entry

The present documentation describes the escalation for the subsequent entry of a clocking. If this process is to be activated, a [configuration](#) must be created for the escalation.

5.1 Subsequent entry of clocking (STMP.APPLICATION_FILED)

If an employee has forgotten to clock, he/she may enter it subsequently in the time sheet in SMA. By doing so, the escalation STMP.APPLICATION_FILED is initiated. This escalation can be used, for example, to notify the supervisor by e-mail. With regard to the [configuration of the escalation](#), the recipient type *Supervisor* must be entered in this example.

In the *Message* tab, the text for the message can be entered:

The screenshot shows a software window titled 'Edit' with a 'Main page' tab. The 'Message' tab is selected, showing a configuration for a message. The 'Subject' field contains 'Subsequent entry of clocking'. The 'Text' field contains a template message with placeholders for employee name, date, time, and a link to confirm the clocking. Below the text field are two dropdown menus for 'Available placeholders' and 'System variables'.

Subject: Subsequent entry of clocking

Text:

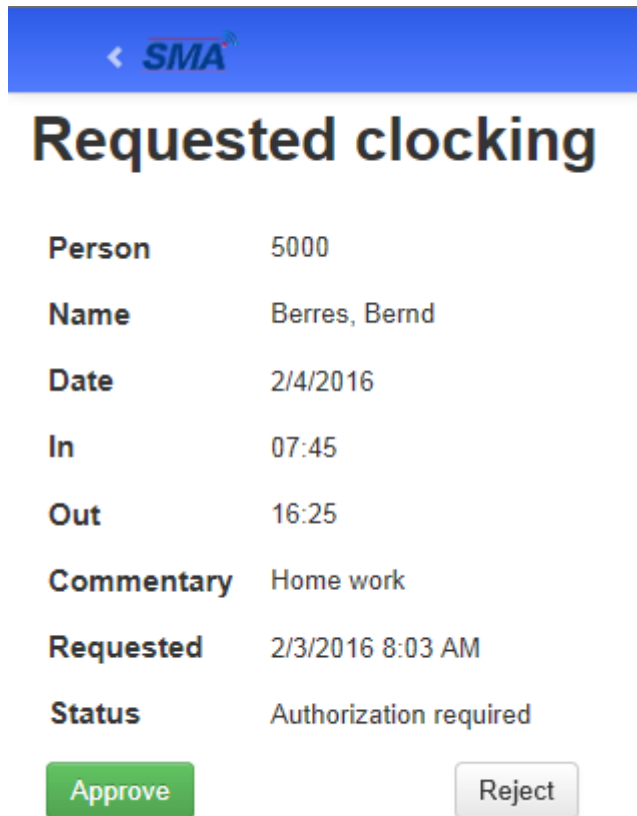

```
%STMP.NAME:PNR%(PNR) clocking subsequently  
entered: %SMP.DATB date mm/dd/yyyy% %STMP.ZEIB  
time hh:mm% - %STMP.ZEIE time hh:mm%  
Click to accept or reject the clocking on the following link:  
http://mos-hyd-01:8082/AppliedClockings/Confirm?  
clockingId=%STM.VERWEIS%
```

Available placeholders: [dropdown]

System variables: [dropdown]

When SMA is used, the recipient can access the SMA application for approving and/or rejecting the clocking entry directly from the e-mail via the link

<http://mos-hydra-01:8082/AppliedClockings/Confirm?clockingId=%STMP.VERWEIS%>. The correct server and, separated by a colon, the related port must be entered in the link. This link is used by the editor to access the following SMA application where he/she may approve or reject the requested clocking entry:

The screenshot shows a web application interface with a blue header bar containing a back arrow and the 'SMA' logo. Below the header, the title 'Requested clocking' is displayed in a large, bold font. A table lists the details of the clocking entry, and at the bottom, there are two buttons: 'Approve' (green) and 'Reject' (grey).

Person	5000
Name	Berres, Bernd
Date	2/4/2016
In	07:45
Out	16:25
Commentary	Home work
Requested	2/3/2016 8:03 AM
Status	Authorization required

The function authorization **sma.ac** is required to start the SMA application.

As an alternative to this SMA application, the clocking entry can also be approved or rejected when the escalation is concluded in the application [current escalations](#).

As long as a clocking entry is requested, it is indicated in HYDRA but not processed. It will, for example, only be considered in the labor time calculation after its approval.

In the *notification* tab you can configure that the message is to be sent by e-mail.

The following placeholders are available for generating the message or for defining conditions:

Event	Identifiers	Description
STMP.APPLICATION_FILED	STMP.PNR	Personnel number
	STMP.NAME:PNR	Name of person
	STMP.PNAME	Last name of person
	STMP.PVORNAME	First name of person
	STMP.FIR	Person's company
	STMP.DATB	Clocking date
	STMP.ZEIB	Start time
	STMP.ZEIE	End time
	STMP.DAT:APPLY	Request date
	STMP.ZEI:APPLY	Request time
	STMP.KST	Clocked cost center
	STMP.BEM	Comment
	STMP.VERWEIS	Unambiguous record number
	PNR.BER	Area
	PNR.KST	Cost center
	PNR.ABT	Department
	PNR.PKREIS	Employee subgroup
	PNR.TAETIGKEIT	Activity of the person
	PNR.BESCHVERH	Employment relationship
	PNR.TEL:FIR	Company phone
	PNR.EMAIL:FIR	Company e-mail
	PNR.VGS:PNR	Supervisor personnel number
	PNR.VGS:FIR	Supervisor company
